## CREIGHTONS CREEK CATCHMENT LOCAL MANAGEMENT

#### 1. Catchment Information

The Creighton's Creek flows into Pranjip Creek upstream of the Goulburn Valley HWY and

encompasses an area of approximately 146 km<sup>2</sup>. The mean annual flow at the bottom of the Creighton's Creek catchment is approximately 5,500 ML/yr.

The catchment is bound to the east by the Sevens Creek catchment and the west by Pranjip Creek. Significant tributaries of Creighton's Creek include Branjee and Little Branjee Creeks. Within the catchment the predominant industry is dryland farming.

#### 2. Management of Licences

Restriction Triggers for each stage of restriction.

| Restriction<br>Stages   | Trigger Values<br>for Introduction<br>of Next Stage of<br>Restriction | Percent<br>Restrictable<br>Demand |
|-------------------------|---|-----------------------------------|
| Stage 5<br>(Suspension) | <=3 ML/day  | 100%                              |

**Note:** Restrictions are implemented during dry periods prior to flows reducing to the trigger value. For example, if a river flow is reducing rapidly, a higher stage or suspension will be put in place before the trigger level is reached to provide for adequate flow for domestic and stock use and the environment.

#### 3. Compliance Point

The Creighton's Creek is visually assessed at the Hume FWY, Euroa.

#### 4. Licences

Licence Allocation in Creighton's Creek and Tributaries

| Licence Type    | Number of<br>Licences | Volume (ML) |
|-----------------|-----------------------|-------------|
| Irrigation      | 4                     | 199         |
| Registered Dams | 11                    | 117         |
| Total           | 15                    | 316         |

#### 5. Additional Information

Stream codes and sustainable diversion limit zones are provided within this document for identification purposes when discussing the catchment diversion management with Goulburn-Murray Water Officers.

#### Stream Codes

Stream codes used in the management of the Seven Creeks and Tributaries: 4050310

#### **Sustainable Diversion Limit zones**

Sustainable Diversion Limit zones used in the management of surface water trade within the Creighton's Creeks catchment: 4051803 4051801
